

Thermoplastic Preheaters.

Horrod's design and manufacture products to suit our customers.

Whether a single preheater with interchangeable *pans, giving colour variance, or a twin unit manufactured and fitted to a dedicated vehicle; we cater for individual requirements.

- ◆ Single / Twin Units
- ◆ Direct Heat / Oil Jacketed (as to material requirements)
- ◆ Thermostatically Controlled
- ◆ Hand or mechanically stirred
- ◆ Mounted on a common frame
- ◆ *Single Unit with interchangeable pans max 25 gallon capacity, direct heat and Hand-stirred only
- ◆ Gate type outlet
- ◆ Single & Twin models Hand Stirred only sizes: 10-15-25 Gallon.
- ◆ Hydraulic Units sizes 25-35-40-50-60 Gallon (larger models if required).
- ◆ Training available

The type of unit required depends on the materials used.

Some materials may require an oil-jacketed pan to prevent direct heat to the material whilst other types need constant agitation.

Thermostatically controlled burners provide the units with the ultimate temperature monitor.

Training in the use of these machines is recommended.

All units come with a user manual and basic maintenance guide.

Gate-Type Outlet.
